

STEEL MILL OFFICE FLOOR PROTECTED WITH BELZONA 5231

ID: 10020

PROBLEM

The offices concrete floors were worn. The customer was looking for a non-slip epoxy coating that would provide years of service.

APPLICATION SITUATION

This company just wanted a better looking, longer lasting floor for their office areas.

APPLICATION METHOD

The floors were prepared with a Blastrac machine. Belzona 5231 was applied. The "shark's teeth" aggregate was broadcast and a topcoat of Belzona 5233 was applied.
