

BELZONA PRESCRIBED AT UNIVERSITY HOSPITAL

ID: 293

PROBLEM

The entrance to the medical center was irregular from the concrete slabs settling "this is a high traffic area, with new born infant incubators, patients in wheel chairs, and sensitive instrumentation all having trouble crossing the area.

APPLICATION SITUATION

Concrete slabs in front of medical center entrance.

APPLICATION METHOD

The application was carried out in accordance with Belzona Know-How System Leaflet FPA-1. Belzona® 4111 (Magma Quartz) was used to level the transition area between slabs, giving a smooth transition.

BELZONA FACTS

Because Belzona can be feather edged and has superior adhesion to the existing concrete, heavy traffic will not deteriorate the cold joint between slabs.

INDUSTRY

General Industry

LOCATION

University Medical Center

APPLICATION DATE

1986
