

BELZONA CREATES ZONAL FLOOR MARKINGS

ID: 4744

PROBLEM

Other floor paints and coloured tape had been tested but found not to have the wear or chemical resistance for this environment. These markings also had to be carried out over a weekend shift so as not to halt production.

APPLICATION SITUATION

A Whisky bottling plant was in need of zonal floor markings. They had to be hard wearing & chemically resistant to stand up to the conditions in this plant.

APPLICATION METHOD

The Application was carried out in accordance with Belzona System Leaflet FPA-08. The areas were roughed with floor grinders. The desired pattern was then taped out. Two coats of 5231 were then applied. A stencil was used to denote the 'zoned area' floor marking.

BELZONA FACTS

Due to the limited preparation required - no substrate removal, the work was able to be carried out over a weekend. The area was able to be opened back up the following Monday ready for production.

INDUSTRY

Food & Drink

LOCATION

Glasgow, Scotland

APPLICATION DATE

February 2013

PRODUCTS

5231 (SG Laminate)

SUBSTRATE

Laminate flooring
