

STEEL OF A RAILWAY PROTECTED WITH BELZONA

ID: 5253

PROBLEM

Corrosion on the steel of a railway.

APPLICATION SITUATION

Railway at a museum.

APPLICATION METHOD

The application was carried out in accordance with Belzona Know-How System Leaflet FPA-3 for protecting floors and drains against chemical attack. A MBX bristle blaster was used to remove any rust and to prepare the surface for application. Belzona 4151 was brush applied in accordance with Belzona Instructions For Use.

BELZONA FACTS

Belzona 4151 is a two-component system that provides a tough, seamless coating suitable for protecting various substrates from moisture ingress, chemical attack and resistance to environmental attack. Belzona 4151 can be applied and cured under adverse conditions and has excellent adhesion to many substrates.
