

BELZONA PROVIDES EXCELLENT SUPPORT FOR HYDRAULIC PAPER CUTTER

ID: 5278

PROBLEM

The customer installed a custom sheeter for their printing operation. The sheeter takes roll stock (paper) and cuts it into sized sheets for a printing press. Alignment is critical to ensure the machine operates properly.

APPLICATION SITUATION

High volume packaging printing company recently installed brand new equipment and the supports required precision alignment.

APPLICATION METHOD

The equipment was assembled and the various feet and supports were jacked and shimmed to exacting standards. Belzona 4131 was then utilized for application in accordance with Belzona Know-How System Leaflet GSS-9 to provide a high-strength, non-shrinking grout to support the machine.

BELZONA FACTS

This Belzona solution will stand up to the constant “hammering” of this hydraulic cutter for many years, easing this customer’s maintenance worries. This application has become the standard for this customer due to Belzona’s previous long-term successes in this plant.
