

BELZONA SEALS SPIRIT BUND

ID: 5602

PROBLEM

New walls were built from engineering brick around the area. The complex geometry & many possible leak points made sealing the bund a challenge.

APPLICATION SITUATION

A 1200 m² bund was having its capacity increased and any potential leak points sealed.

APPLICATION METHOD

The application was carried out in accordance with Belzona Know-How System Leaflet TCC-15. The floor was prepared with grinders before Belzona 4131 and Belzona 4141 were used to repair defective areas. Fillets were created with Belzona 4131 at all corners around the bund. Finally, two coats of Belzona 5811 were applied to completely seal the area.

BELZONA FACTS

The Belzona application was carried out in conjunction with other works in the bund. It was able to deal with various problem areas found during the refurbishment and the work was completed in the allotted time frame.

INDUSTRY

Food & Drink

LOCATION

Distillery, Glasgow, Scotland

APPLICATION DATE

October 2014

PRODUCTS

Belzona 4131 (Magma-Screed)

Belzona 4141 (Magma-Build)

Belzona 5811 (Immersion Grade)

SUBSTRATE

Concrete & floor tile
