

BELZONA REPAIRS REFINERY BOILER ROOM ROOF

ID: 6053

PROBLEM

Spalled concrete on the parapet side of the roof allowed water ingress that resulted in flooding inside the Boiler Room.

APPLICATION SITUATION

Parapet wall on Boiler room.

APPLICATION METHOD

Application was carried out in accordance with Belzona Know-How System Leaflets RPA-9, RPA-10 & RPA-11. Spalled concrete was rebuilt with Belzona 4111 before weatherproofing area with Belzona 3111 system.

BELZONA FACTS

This was the first time this type of repair solution was carried out for this customer. However, previous successful Belzona solutions in other parts of the plant gave them the confidence to use Belzona in this situation. Belzona 3111 system bonds to most surfaces so ideal for sealing between dissimilar surfaces.

INDUSTRY

Chemical & Petrochemical

LOCATION

Oil & Gas Company, Saudi Arabia
