

BELZONA GRIP SYSTEM OUTSTRIPS THE COMPETITION

ID: 6104

PROBLEM

In 2005 the client had used Belzona 4411 on a series of external ramps to avoid slip incidents. As they later found adjacent areas that were undercover were also hazardous, they applied slip resistant adhesive tapes from a leading manufacturer. Unfortunately, the tapes would repeatedly fail and the loss of adhesion at the edges meant that they became trip hazards. These tapes would have to be reapplied every 12-18 months which was costly and disruptive. In the same 6-year period the Belzona materials had suffered only very minor damage, and so the client decided to extend the original application onto the undercover areas.

APPLICATION SITUATION

Grip Coating for Ramps and Corridors.

APPLICATION METHOD

Application was carried out in accordance with Belzona Know-How System Leaflet FPA-8.

BELZONA FACTS

Belzona 4411 is solvent free and applied in a single coat, making the application very fast and ideal for sensitive areas. There are also a choice of colours and aggregates that can even survive heavy vehicle traffic. In 2016 the original areas were revisited and Belzona system continued to offer superb performance after 11 years continuous service.

INDUSTRY

General Industry

LOCATION

Pharmaceutical Company, UK

APPLICATION DATE

2005 - 2011

PRODUCTS

Belzona 4411 (Granogrip)

Belzona 9231 (Surefoot Aggregate)

SUBSTRATE

Concrete
