

CAST IRON BELZONA GRIP ON COAST

ID: 6105

PROBLEM

These steps had been worn down after decades of use from the public. The polished surfaces were slippery even when dry, and in wet conditions they were treacherous. These steps led to a very popular breakwater and beach, and so access through the day could not be restricted. In addition, there was about to be a major “Big Ships” event, and thousands of visitors were expected to be using these steps. With “Slips & Trips” being the main source of reported injuries in the UK, the client was very conscious of the risks to the public.

APPLICATION SITUATION

Ancient Cast Iron Steps leading down to the breakwater and beach.

APPLICATION METHOD

Application was carried out in accordance with Belzona Know-How System Leaflet FPA-8.

BELZONA FACTS

Belzona 4411 is a solvent free and self-priming material that can be applied in a single coat. This allowed the application to be done quickly and after an overnight cure the area was reopened to the public. Not a single slip was reported during the popular maritime event which followed. In addition, the Belzona solution continues to offer protection from erosion and corrosion in one of the most exposed area of this coastline.

INDUSTRY

LOCATION

Port Authority, Teesside, UK

APPLICATION DATE

2010

PRODUCTS

Belzona 4411 (Granogrip)
