

BELZONA COLD BONDING TECHNOLOGY PREVENTS PIPE VIBRATION

ID: 8230

PROBLEM

Pipelines of petrochemical storage tanks have been subject to vibration during loading and unloading. This problem is exacerbated by the increased frequency of loading and discharge, and the damage to the structure is also more serious. Therefore, an additional support frame is needed to solve this problem. However, due to safety restrictions, hot work is not allowed. In this case, the customer specifically chose Belzona's cold-bonded steel sheet as an additional support frame.

APPLICATION SITUATION

Petrochemical storage tank.

APPLICATION METHOD

Application carried out in accordance with Belzona Know-How System Leaflet VPF-15.

BELZONA FACTS

By installing additional supports on the tank roof, Belzona provides customers with an effective solution eliminating vibration of pipelines. Cold bonding technology avoids hot work. This application was completed in only 4 hours.

INDUSTRY

Chemical & Petrochemical

LOCATION

Petrochemical plant in Bohai, China

APPLICATION DATE

2010

PRODUCTS

Belzona 1111 (Super-Metal)

SUBSTRATE

Carbon steel
