

BELZONA PREVENTS SLIPS & TRIPS BY USING A POSITIVE GRIP COATING SYSTEM

ID: 8534

PROBLEM

The customer wanted a coating that was both visible and tangible, as the loading ramp can be raised to 1.15m.

APPLICATION SITUATION

Aluminium checker plate loading ramp.

APPLICATION METHOD

The application was carried out in accordance with an adapted version of Belzona System Leaflet FPA-08.

The surface was initially prepared using appropriate power tools. It was then coated using Belzona 4411, followed by the incorporation of Granogrip prior to being over coated with a second layer of Belzona 4411.

BELZONA FACTS

Belzona 4411 not only provided a visually striking coating that would raise visual awareness but thanks to the incorporation of aggregate fillers also provided a physically grippy surface making employees aware of the risk area they are operating within.
